Jan 1st. Closed (New Years)

## Help Prevent Frozen Pipes

- Keep garage doors closed
- Keep heat in home at minimum of 55 degrees
- Allow faucets to drip if served by exposed lines.
- Insulate exposed pipes.

If leak occurs, turn off your main water cut-off valve to prevent water loss and call a licensed plumber to repair the leak. If you cannot find the main water cut-off valve, call WS Town Hall for assistance.
